

Open Educational Resources for Online Learning: A Practical Approach

March 14 - April 08, 2022

Massive Open Online Course On Open Educational Resources

The National Open University of Nigeria (NOUN), in collaboration with the Commonwealth of Learning (COL), is pleased to launch the second in the series of four-week Massive Open Online Course (MOOCs) on Open Educational Resources (OERs).

Course Description

Open Educational Resources (OERs) have been recognised as a means to provide current and high-quality content in various fields of study. OERs bridge gaps of the inadequate number of required professionals and encourage collaboration that enhances the quality of knowledge and skills taught or learned. The need for OERs has become critical in the context of the COVID-19 pandemic and its potential contributions to educational recovery. Despite the availability of useful OERs, many do not know how to integrate them in teaching and learning. Therefore, in this course, you will learn how to plan, write, and evaluate OERs for integration in online learning content.

Cost: Free

Duration: 4 weeks

Language of instruction: English

Target Audience

The target audience is educational practitioners, trainers, researchers, and all with interests in how to use Open Educational Resources for teaching and learning.

Certification

Active engagement in the activities and completion of assignments will qualify you to earn a certificate of achievement.
